### **Summary**

Evidence bundle identifying misconduct in office of  
Attorney General Jeremy Wright MP  
Robert Neil MP  
Lord Chancellor Elizabeth Truss MP

with the intent and effect of hiding Deutsche Bank's money laundering  
HSBC's conspiracy to pervert the course of justice  
and the gold price rigging cartel run by Deutsche Bank and HSBC

### **Details**

1. A document was sent to Parliament to a number of MPs informing them of Deutsche Bank's settlement for gold and silver price rigging in New York in which the bank incriminated Scotiabank and HSBC as fellow co-conspirators in the cartel. This ran contrary to the banks' claims in the Birmingham High Court denying such manipulation in lawsuit BM40B021. The document alleged that the banks had achieved a strike-out of the lawsuit by corrupting JACO – the Judicial Appointments and Conduct Ombudsman and a number of judges including the Lord Chief Justice. Elizabeth Truss, the Lord Chancellor, was a recipient of that document.
2. As a result of that document HMRC eventually emailed me to arrange a phone call in which they asked for clarification of the issues I raised. In the phone call, and in my email reply, I asserted that Deutsche Bank appears to have destroyed Over-The-Counter bullion trading receipts, which implies both Anti-Money-Laundering control violations and tax evasion. I also informed HMRC that Deutsche Bank's gold price manipulation audit had to be fake, as I asserted in the lawsuit, given the correspondence Deutsche Bank sent to me that contradicted its claims in a Reuters news article. I told HMRC that they need merely demand a copy of my receipts from Deutsche Bank – to validate the claim that receipts had been destroyed – and to demand some evidence, such as an interim report – to determine whether Deutsche Bank's audit was fake or genuine.
3. A document was sent to Parliament accusing the heads of the SFO and FCA of corruption – it provided a paper trail of emails sent to them that had demonstrated Deutsche Bank's gold price manipulation audit was fake long before the New York settlement. Neither agency had followed up the allegations. Jeremy Wright MP was emailed the document via both his constituency address and via the address for him in his capacity as Attorney General.
4. The SFO emailed me to say they would not be looking into the allegations that were delivered to them from the HMRC. I emailed SFO back criticizing the decision. It is unbelievable that a mere field agent could make the decision not to follow the allegations. Such a decision would have to come from the executive.

5. Jeremy Wright MP, as Attorney General, is head of the SFO. He made no reply to the accusations of corruption in the SFO and the FCA. Given all the evidence against Deutsche Bank, which is in the public domain, under his direction the SFO allows Deutsche Bank to get away with no due scrutiny of its precious metal trade, when it confesses to manipulating the precious metal markets.
6. Elizabeth Truss as Lord Chancellor has the duty to take allegations of corruption in the office of the Lord Chief Justice and JACO seriously. She was supplied with the CRO against me which asserted that accusations of precious metal price manipulation are totally without merit, when the applicant to the CRO, HSBC, is incriminated for gold price manipulation. There was no excuse for her not to take the evidence seriously. I believe the CRO would have to go through the office of the Attorney General, which would have been Jeremy Wright MP at the date of application.
7. An email demonstrating serious misfeasance on behalf of the SFO and the Attorney General was sent to the individual members and civil servants involved in the *Justice Select Committee*. Robert Neil, chairman of that committee, refused to force the head of the SFO or the Attorney General to explain himself – when it is the duty of the committee to review the function and administration of the SFO.
8. The Justice Committee was also informed that the Attorney General's malfeasance covered up Deutsche Bank's liabilities for precious metal manipulation, this had the effect of compromising his role as counsel for the defence in the Brexit lawsuit in which he is involved.
9. Robert Neil is known to have opposed Brexit – as did Jeremy Wright. It is patent, that the two MPs with the most immediate duties to direct the SFO's investigations into Deutsche Bank for precious metal price rigging and money laundering have violated those duties to ensure the British public is ignorant of the liabilities we face for dallying with article 50.
10. The \$10 billion of money laundered from Deutsche Bank's Russian offices into London implies direct tax evasion of the order of this sum. The SFO's refusal to investigate on behalf of the HMRC is of the order of fraud of the HSBC tax evasion scandal involving Swiss banks. Jeremy Wright MP is the politician most responsible for HMRC prosecutions.

## Contents

The evidence bundle is best served and viewed electronically. It consists of a number of folders of emails and their attachments. The emails were pasted from google mail in plain-text format that records digital signatures used to verify sender, recipient and message content – permitting the use of the emails as evidence in any court of law. Pdf and jpg files are also included that were attached in the original emails.

The folder ***hmrc and sfo emails*** records discourse between myself and HMRC that shows I contacted Jon Thomson, the head of the HMRC, who then initiated some degree of investigation into Deutsche Bank. The investigation appears to have been stopped by the SFO.

The folder ***attorney general emails*** shows that Jeremy Wright MP was informed that both the FCA and the SFO had neglected to do their jobs in probing Deutsche Bank for precious metal price manipulation based on the evidence I had supplied to them over a year ago. There was no reply from Jeremy Wright, and no sign of an investigation. With SFO closing the investigation explicitly the natural conclusion is that Jeremy Wright MP was complicit in the FCA misleading Parliament and conspires with HSBC and Deutsche Bank to pervert the course of justice.

The folder ***lord chancellor emails*** lists a number of emails and attachments in which Elizabeth Truss MP was either the direct recipient or was Cced for her records. There was only ever one reply from her office, and it whitewashed all responsibilities in the matters.

The folder ***bob.neil*** lists the emails sent to and from the Justice Select Committee in the matters alleging that the SFO had been subverted by the Attorney General.

I believe everything in this document and attached evidence bundle is true.
