Introduction

The **staley.bundle.pdf** was generated from the scans of 53 A4 pages from various sources. The number system here gives the number of the page in the electronic document and not the numbers printed on the pages themselves. The dates in many documents (25/09/2017) on the top left refer to the time at which documents were printed out for the compilation of the bundle and should not be confused with other timestamps in the document.

The bundle shows that Jes Staley is involved with elite paedophile rings, particularly those connected to Jeffrey Epstein, further that Parliament & Staley together covered up the fact he won his position as CEO of Barclays by capitalizing upon those paedophile rings. His ability to blackmail the government is reflected in his response to the email which shows contempt for the facts that incriminate his bank for gold rigging frauds.

22-24	Third party allegations against Anthony Jenkins, former CEO of Barclays and his ex-wife accused of running elite paedophile ring involving Qatari VIPs. While the validity of the story has not been established, the allegations are consistent with the general narrative and should be testable by cross-examination of the parties named in the article.
25-28	Staley reported by Reuters 8 Feb 2017 for conspiring to keep frauds secret from the board of Barclays. An attempt was made to discover what was kept secret in FOIA request FOI5239 to the FCA but was refused. Court action may be needed to force the FCA to respond constructively. At the bottom of that article are allegations Staley abused his position at Barclays to do personal favours for his brother-in-law.
